TACKLING CLIMATE CHANGE

Canadians are feeling the impacts of climate change with flooding, wildfires, heat waves, and other extreme weather events - projected to intensify in the future. Our federal Liberal government is taking urgent action to support clean growth and ensure a safer, prosperous future for future generations.

Plan and our investments in public transit and green infrastructure, we are making significant progress in transitioning to a cleaner economy.

In June, our federal Liberal government made two very important announcements: an agreement with all provinces and territories to introduce national standards for plastic recycling in an effort to dramatically increase recycling rates in Canada; and starting in 2021, the Government of Canada will begin banning single-use plastics.

We want to help our economy and our workforce transition without leaving Canadians behind. Here at home in Davenport, families will be better off with the Climate Action Incentive; the average family of four will receive \$307 this year to help them adapt to our changing climate.

CANADA'S CLIMATE PLAN

- A price on pollution
- Renewable energy
- Public transit
- Clean tech and clean jobs
- Energy efficiency

#EnvironmentEconomy

Our clean growth and climate action plan is creating the biggest drop in pollution in the history of Canada's emissions reporting. From ensuring that there is a price on pollution in jurisdictions across Canada, to accelerating the phase-out of traditional coal power, to our \$1.5 billion Oceans Protection

✂

What other actions would you like to see the federal government take to fight climate change?
